

This discussion guide—along with help from your doctor—may help you get the most from your treatment with Repatha®. We know that managing stubborn high bad cholesterol (LDL) can be challenging, especially if you have had a heart attack. We're here to help you lower your bad cholesterol and do your best to stay healthy while you enjoy life, too.

Questions for you

How do you feel when it comes to lowering your high LDL bad cholesterol? (check all that apply)

Happy (with your progress)

Frustrated (due to lack of progress)

Hopeful (about your progress)

Intimidated (by how unattainable your goal feels)

Determined (to reach your goal)

Judged (for still struggling to lower your LDL)

Why did you pick that/those feeling(s)?

Did you set an LDL goal with your doctor? If yes, what is your goal number?*

Yes No

My LDL goal: _____ mg/dL

What is your current LDL number?*

_____ mg/dL

*It's okay if you don't know. Your LDL number measures the bad cholesterol level in your body. A goal number is the cholesterol level you are trying to reach, and stay under, through treatment.

Approved Use

What is Repatha®?

Repatha® is an injectable prescription medicine used:

- in adults with cardiovascular disease to reduce the risk of heart attack, stroke, and certain types of heart surgery.
- along with diet alone or together with other cholesterol-lowering medicines in adults with high blood cholesterol levels called primary hyperlipidemia (including a type of high cholesterol called heterozygous familial hypercholesterolemia [HeFH]) to reduce low density lipoprotein (LDL) or bad cholesterol.

Important Safety Information

Do not use Repatha® if you are allergic to evolocumab or to any of the ingredients in Repatha®.

Before you start using Repatha®, tell your healthcare provider about all your medical conditions, including if you are allergic to rubber or latex, are pregnant or plan to become pregnant, or are breastfeeding or plan to breastfeed.

Please see additional Important Safety Information throughout.

Questions to consider asking your doctor

Understanding my numbers

What do my HDL (good) and LDL (bad) cholesterol numbers actually mean for my health?

How does Repatha® (evolocumab) injection work to lower my LDL (bad) cholesterol?

If monitoring my cholesterol numbers is important to keep my treatment on track, how often should I get tested?†

Every: _____

†You can keep track of your LDL using the Lipid Panel Tracker at <https://www.repatha.com/LDLtracker>

Managing my expectations

Have I reached my LDL goal yet?

Yes → I did it! What can I do to continue seeing these good results with Repatha®?

No → How should I feel about my results?

How can I improve my results?

Taking Repatha®

Is my current dosing option right for me?

What do I do if I miss my dose?

Important Safety Information (Cont'd)

The needle covers on the single-dose prefilled syringes and the inside of the needle caps on the single-dose prefilled SureClick® autoinjectors contain dry natural rubber. The single-dose Pushtronex® system (on-body infusor with prefilled cartridge) is not made with natural rubber latex.

Tell your healthcare provider or pharmacist about any prescription and over-the-counter medicines, vitamins, or herbal supplements you take.

What are the possible side effects of Repatha®?
Repatha® can cause serious side effects including serious allergic reactions. Stop taking Repatha® and call your healthcare provider or seek emergency help right away if you have any of these symptoms: trouble breathing or swallowing, raised bumps (hives), rash or itching, swelling of the face, lips, tongue, throat or arms.

Please see additional Important Safety Information throughout.
