

## Talking with your doctor about *further lowering* your LDL (bad cholesterol)

You may have plaque-related heart or blood vessel problems and high LDL. Or, maybe you have inherited high LDL (heterozygous familial hypercholesterolemia).

You're eating right and taking the highest dose statin you can. But, your LDL still isn't where it should be.

If so, **Repatha® might be right for you.** Find out during your next doctor's visit and use these questions to help guide your conversation.

**1. What is my LDL number?**

---

**2. What causes my LDL to be high?**

---

**3. Why do I need additional treatment to help lower my LDL?**

---

**4. How does Repatha® work differently than my current treatment?**

---

**5. What kind of results could I expect with Repatha®?**

---

**6. How do I take Repatha®?**

---

**7. What are the possible side effects of Repatha®?**

---

**8. If Repatha® is right for me, how can I get help paying for it?**

---

### Important Safety Information and Approved Use

#### Approved Use

Repatha® is an injectable prescription medicine called a PCSK9 inhibitor. Repatha® is used:

- along with diet and maximally tolerated statin therapy in adults with heterozygous familial hypercholesterolemia (an inherited condition that causes high levels of LDL) or atherosclerotic heart or blood vessel problems, who need additional lowering of LDL cholesterol.

The effect of Repatha® on heart problems, such as heart attacks, stroke, or death, has not been determined.

#### Important Safety Information

**Do not use Repatha® if you** are allergic to evolocumab or to any of the ingredients in Repatha®.

**Please see additional Important Safety Information on page 2.**

---

## Important Safety Information (continued)

**Before you start using Repatha®**, tell your healthcare provider about all your medical conditions, including allergies, and if you are allergic to rubber or latex, are pregnant or plan to become pregnant, or are breastfeeding or plan to breastfeed.

Tell your healthcare provider or pharmacist about any prescription and over-the-counter medicines you are taking or plan to take, including natural or herbal remedies.

### **What are the possible side effects of Repatha®?**

Repatha® may cause allergic reactions. Call your healthcare provider or go to the nearest hospital emergency room right away if you have any symptoms of an allergic reaction including a severe rash, redness, severe itching, a swollen face, or trouble breathing.

The most common side effects of Repatha® include: runny nose, sore throat, symptoms of the common cold, flu or flu-like symptoms, back pain, and redness, pain, or bruising at the injection site.

Tell your healthcare provider if you have any side effect that bothers you or that does not go away.

These are not all the possible side effects of Repatha®. Ask your healthcare provider or pharmacist for more information. Call your healthcare provider for medical advice about side effects.

**You are encouraged to report negative side effects of prescription drugs to the FDA. Visit [www.fda.gov/medwatch](http://www.fda.gov/medwatch), or call 1-800-FDA-1088.**
